

**Amendments to the Specification:**

Please amend the Specification as follows:

The third full paragraph on page 4 is to be amended as follows:

In air accumulation chamber 2 there is at least one air intake stub 9 for raw air 10 of an air filter container 10, which is held in form piece 7 and tightly closed in on the end side, as shown in greater detail by fig. 2.

The first full paragraph on page 5 is to be amended as follows:

In fig. 1, this space 2 is showed in greater detail in diagrammatic representation, and to hold front end covering 3, there is provided a grating-shaped bearing part 4 14, which, however, is completely covered by front end covering 3.

The third full paragraph on page 5 is to be amended as follows:

Air intake openings 11 ~~or~~ and/or outlet openings 12 may also be covered by screens, valves or other similar means, so that snow, sand, water and other kinds of foreign material cannot get into space 2 or can {get in} only partially.

Please amend the Specification section headings as follows:

At page 1, delete the underline from "BACKGROUND AND SUMMARY OF THE INVENTION"

At page 3, delete the underline from "BRIEF DESCRIPTION OF THE  
DRAWINGS"

At page 3, delete the underline from "DETAILED DESCRIPTION OF THE  
DRAWINGS"
